**DETAILED ACTION*****Response to Amendment***

The rejections under 35 USC 101, 112, 102(b), and 103 as described in the office action mailed on April 18, 2005 have been withdrawn in view of the amendment filed on June 6, 2005. The applied prior art does not disclose or suggest a process as claimed in which the feed has a weight ratio of molecules having at least 60 carbon atoms and molecules having at least 30 carbon atoms is less than 0.10. Also, a lubricant having the claimed ratio of monocycloparaffins to multicycloparaffins and viscosity index greater than that which is defined by the claimed equation is not disclosed or suggested by the prior art of record.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of copending

Art Unit: 1764

Application No. 10/744870. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a process for producing a lubricant in which an F-T product stream is dewaxed and hydrofinished to produce a lube base oil. The claims of 10/744870 do not include the step of blending the base oil with at least one lubricant additive. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the claims of 10/744870 by including the step of blending the base oil with at least one lubricant additive because blending such additives with the base oil will improve various properties of the base oil.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 13-30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of copending Application No. 10/744389. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a lube oil that has the same characteristics. The claims of 10/744389 do not include at least one lubricant additive in the composition. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the claims of 10/744389 by including at least one lubricant additive in the composition because blending such additives with the base oil will improve various properties of the base oil.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
